

Fact Sheet

Overview	<p>Pacific Wireless is a leading provider of fixed wireless broadband solutions for the SME and corporate market. The company delivers high speed internet access and data services using best of breed wireless technologies instead of the more traditional fibre optic cable.</p> <p>A licensed telecommunications carrier, Pacific Wireless operates a state of the art network and is progressively building out national coverage.</p>
Founded	1999
Ownership	Privately held
Headquarters	Melbourne, Australia
Products and Services	<p>Pacific Wireless provides “First Class Broadband” solutions for organisations requiring high reliability and high bandwidth. The service is ideal in situations where fibre optic cable is either not available or is prohibitively expensive.</p> <p>A range of value added services, including VPN installations, are offered by the company.</p>
